

## Insuring sustainable business-IT alignment through technology transformation services

- Reduce time-to-market
  - Comply with stringent regulatory requirements
- Build customer-oriented service capabilities
  - Achieve cost and operational efficiency
- Transform policy and claim administration

INSURANCE

A dynamic business environment, tightening insurance regulations, and price-focused but highly demanding customers are few of the top challenges faced by insurers globally. At NIIT Technologies, we provide the insurance providers with an umbrella offering of Application Maintenance, Legacy Modernization, Package Implementation Testing, BPO and Business Consulting. With expertise in these areas we help in transforming the IT landscape to respond efficiently to shifting business dynamics and successfully overcome challenges.

NIIT Technologies has over two decades of extensive experience in providing a range of technology services to Fortune 1000 insurance services providers. We have been helping insurers modernize legacy systems and re-engineer business processes to enhance business agility, improve operational efficiency, reduce costs and improve margins.

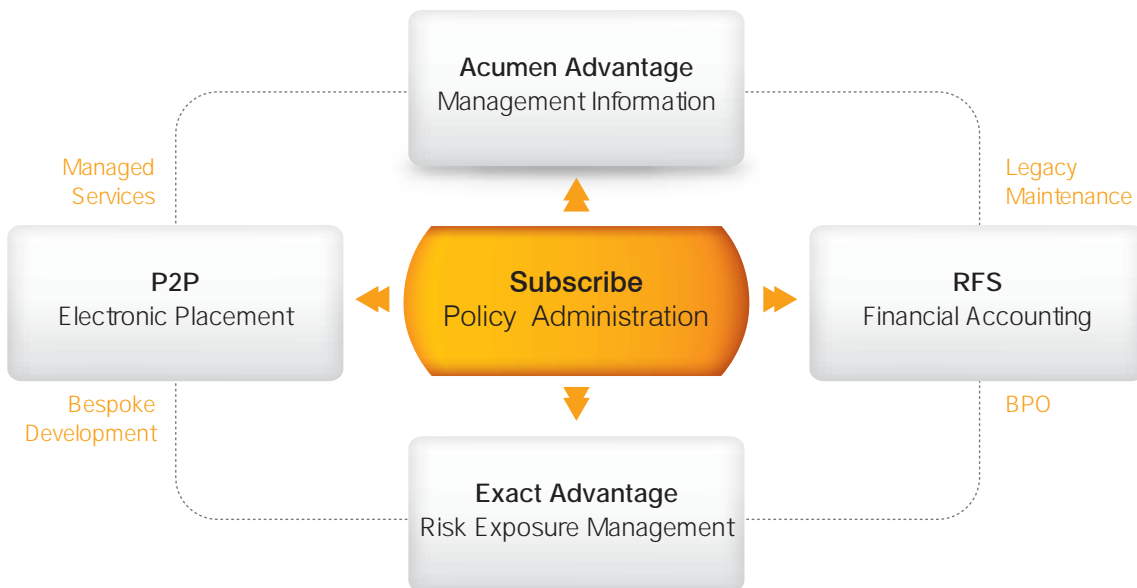

**RFS:** The NIIT Technologies Financial Solution (RFS) generates financial data for all statutory and management reporting, enabling you to meet financial reporting requirements cost-effectively and with ease. For multinational operations, RFS can generate all the data needed to support highly efficient production of regulatory returns for the jurisdiction in which each legal entity operates.

**ipf3 Development Framework:** An extremely powerful solution that combines powerful systems integration capabilities, a highly modular architecture, and a state of the art user interface to help you tailor your business processes with precision.

- ipf3 Rate Monitor: Increasing regulatory demands require managing agents to react quickly to changing regulatory requirements such as the new Performance Measurement Data (PMD) initiative being introduced by Lloyd's.

## Insurance Frameworks

**Life Persistency Framework:** Lapsation management framework addresses the entire gamut of activities including identification of lapsed policies, design, execution, monitoring, and evaluation of revival campaigns, and much more.

**Advisor Portal:** A portal solution for brokers and agents to track their entire book of business.

**iPhone App for Insurance:** Cover alerts, fund performance, and fund switch requests among others functions from your mobile device.

## Horizontal Frameworks

**Code Comprehension Framework:** A set of tools to handle legacy code that can be configured for any legacy language and can be used as a data migration tool for decommissioning projects.

**AssureEasy:** Best-of-breed, on-demand solution for operational risk, technology risk, and compliance management. Every business faces regulatory, financial, legal, and reputational risk on an ongoing basis. AssureEasy enables customers to evolve the daily management of these risks into real competitive advantage.

## Business Alliance

NIIT Technologies Insurance Practice has established partnerships with a variety of leading applications providers including:

### • FICO:

- Blaze Advisor® business rules engine/management system, which provides insurance companies with a scalable solution that enables smarter business decisions
- Underwriting, Pricing and Produce Management solution, which allows insurance companies to accurately predict risk and set appropriate price
- Claims Processing and Management solution, which enables insurance companies to process and manage claims quickly and efficiently

### • VUE Software:

- Compensation Management solution, which provides a comprehensive and insurance industry focused commission and incentive management system
