## NIIT Technologies, Hitachi Asia set up data center

NIIT Technologies Limited, a global IT solutions provider and Hitachi Asia (Thailand), an IT services company have jointly launched a high-reliability cloud computing service. The cloud computing hub will be hosted in NIIT Technologies' data center in Bangkok, initially serving only local Japanese corporations.

To bring this project to fruition, both companies leveraged their expertise in data center management to unveil the first phase of its cloud computing services. Hitachi Asia (Thailand) and Hitachi Information System handled the design and architecture of the cloud system while NIIT Technologies worked on the implementation and maintenance of the system.

"With our strong track record in managed services this partnership would provide enhanced value to our customers. Cloud computing is a pioneering service being introduced to supplement our increased focus around non-linear services, explained Arvind Mehrotra, Executive Vice President, NIIT Technologies.

Both the companies are expected to leverage their strengths for solution designing, SaaS application development, sales and marketing to evangelize this technology. "Based on Hitachi Asia's corporate vision, we will initiate business, take the lead and sustain growth in Asian markets proactively by focusing on our social innovation business which includes information and telecommunication systems. Hitachi Asia Thailand's cloud computing service can meet Asia's IT needs which is forecasted to shift from maintenance to usage of IT assets," said Kazuo Karasawa, Managing Director, Hitachi Asia (Thailand).

The suite of cloud-based offerings has been nicknamed 'Caliver' -- a portmanteau of the words 'cloud', 'alive' and 'responsive'. Services include resource on demand, virtual mail hosting and virtual web hosting services on the cloud.
