ADVANTAGEsuite

Where the benefits add up

www.thebenefitsaddup.com
A platform designed to leverage change
In a constantly changing world where new risks emerge all the time, insurers need to continually adapt and deliver profitable growth.

AdvantageSuite lets you quickly integrate new companies, teams or business lines into existing business operations and processes. The flexibility of AdvantageSuite’s Product and Process Manager to support new data capture, exposure management and analytical requirements helps ensure you can grow at the pace you want and maximise your return on investment.

- Rapid on-boarding of new products and teams
- Evolution of products over time (versioning)
- Mainstream technologies

Navigate through challenges. Seize opportunities.
Insurers need to be effective and efficient to secure advantage in the dynamic environment where they operate.

AdvantageSuite, its flexible product building, versioning, and extensive audit and benchmarking capabilities provide you with all the tools you need to maximise operational efficiency.

The suite allows an evolutionary approach to defining organisational standards, where internal best of breed approaches can be brought to bear across organisations over time.

- Process benchmarking within and across teams or organisations
- Process at the core, not just a wrapper
- Seamless integration to third-party workflow; leverage existing investment
The timing of a decision is often as important as the decision itself. Understand the impact of adding a new risk to your portfolio before you make the commitment.

Organisations typically have a wealth of data available, but are unable to surface this in a timely manner at the right point in the business process, to the right people. AdvantageSuite enables optimal value from your data assets.

• Elevation of business and management information to the front office
• Point in time reporting – expose the right reports at the right time
• Configurable validations, checks and data requirements per insurance product
Innovation is continuous. Remove constraints to innovation.

Companies want systems that are cost effective, quick to deliver change, entrepreneurial and have longevity.

AdvantageSuite sets you free from technology constraints making technology an enabler for business. AdvantageSuite gets the best from technology but doesn’t let it come in the way of business innovation.

- Rapid insurance product development and on-lining using Product Manager
- Product versioning allows natural evolution of products over time
- Customer configurable business rules, workflow, data capture, notifications and master data
One of the biggest bottlenecks to progress is the fear of change and fear of discontinuity. Organisations struggle to find an upgrade path that minimises disruption to business.

The implementation framework provides a cohesive approach to help customers implement the AdvantageSuite. With its powerful underlying architecture and design the framework provides a robust, web based platform for facilitating seamless implementation.

- Prototype changes in real time
- Compare the results and assess the benefits of one configuration over another
- Ensure no data loss through integrated accuracy checks
Sustainable differentiation drives growth. Stand out.

For insurers to get ahead of their industry dynamics they need differentiators that are sustainable over the long term. They need to differentiate on industry fundamentals; superior product and customer experience.

AdvantageSuite focuses on your core capabilities and allows you to harness your strengths to create a sustainable competitive advantage.

- Underwriting excellence
- Enhanced customer service
- Optimal capital management
Insurance systems are traditionally boring and rigid. They don’t adapt, they expect their users to adapt. We believe it’s time to change.

AdvantageSuite is designed keeping in mind the needs of people. The focus has been on users, on making the entire experience more rewarding and more enjoyable. Usability has been at the heart of its design. Everything that you need; nothing that you don’t.

- Role based intelligent interface
- Minimal clicks; maximum output
- Context sensitive reporting

It is the little things that matter. You are important to us.
Flexibility unleashed.
Value retained.

The whole is always greater than the sum of its parts. AdvantageSuite however, supported by its flexible architecture allows logical grouping of capabilities and features. The design offers opportunity to tailor the combination of capabilities in line with specific requirements.
AdvantageSuite Acumen offers the analytics engine and data management capability across the entire suite of products.

- Contextual analytics at the point of decision making
- Pre-packaged analytic packs
- Unified and a trusted source of data
- Disciplined data governance, transparency and auditability
- Assimilates the growing proliferation of new data sources
AdvantageSuite Navigator combines the capabilities around underwriting, policy administration, and claims management.

A flexible process and workflow engine sits at the core of AdvantageSuite Navigator:

- Service-oriented architecture enabling integration capabilities with other systems
- Configurable user experience providing embedded compliance and role-based usage
- Customisable and code independent product definition
- Efficient, cost-effective and seamless upgrade strategy
AdvantageSuite Exact is an enterprise-wide exposure management system, allowing insurers the ability to quickly and easily visualise and manage risk exposure across all lines of business.

Designed to support underwriters in their decision-making process, through the provision of hazard and accumulation information at the point of underwriting.

- Sophisticated exposure calculation engine
- Risk impact awareness at the point of submission
- Intuitive mapping interface
- Accurate geocoding
- Extensible and efficient data capture
